

IBM Cognos TM1

IBM® Cognos® TM1 software provides a real-time approach to consolidating, viewing, and editing enormous volumes of multidimensional data for planning and reporting. Using a patented, 64-bit, in-memory OLAP server, IBM® Cognos® TM1 has a proven track record supporting financial performance management.

The IBM® Cognos® TM1 high-performance engine empowers users to perform analysis on frequently changing data across millions of transactions, from daily to even hourly data. With the power of 64-bit technology to meet even the most complex analytics needs of large-scale operations, you can query data whenever you need to—no matter how vast the data set may be.

IBM Cognos TM1 software is available in the following editions.

IBM Cognos TM1 MidMarket Edition

Complete financial performance management (FPM) solution for midsize organisations. This is an amazing value package for small to medium business.

IBM Cognos TM1 Standard Edition

Real-time analysis with read-write capabilities using a 64-bit, in memory OLAP server.

IBM Cognos TM1 Web

Real time Web-based reports and charts directly from Microsoft Excel
