

IBM Cognos 8 Business Intelligence

All capabilities. One product. One platform.

IBM® Cognos® 8 BI delivers the complete range of BI capabilities on a single service-oriented architecture (SOA). Provide the capabilities and information you need to make better decisions. Use reports, analysis, dashboards and scorecards to monitor business performance, analyze trends and measure results. A service-oriented architecture makes it easy to deploy and manage.

- Build reports, OLAP cubes, dashboards and scorecards using all data sources.
- Proven scalability to hundreds of thousands of users.
- Modular deployment lets you meet immediate user needs and expand or modify as needed.

The IBM® Cognos® 8 BI range includes the following software.

IBM Cognos 8 Report Studio

Write and deliver any type of report, adaptable to any data source, quickly and easily.

IBM Cognos 8 Analysis Studio

Analyze and report against online analytical processing (OLAP) and dimensionally aware relational sources.

IBM Cognos 8 PowerPlay

Analyze and report against online analytical processing (OLAP) and dimensionally aware relational sources using the new IBM Cognos 8 version of PowerPlay Enterprise Server.

IBM Cognos 8 Metric Studio

Build scorecards to align teams and tactics with strategy.

IBM Cognos 8 Data Manager

Create data warehouses and repositories for reporting, analysis and performance management.
