

IBM Cognos 8 v4

INFORMED, ENGAGED, ALIGNED

IBM Cognos 8 v4 delivers new capabilities that make users better informed, more engaged, and better aligned to your corporate strategy. It ensures that you can deliver trusted information to your users, with the security and control demanded by IT and Financial professionals. Many factors influence your organisation's performance, but few areas are more important than your organisation's decision making ability. Getting answers to the questions of how are we doing, why are we doing it and what should we be doing? are fundamental to your organisations performance. By integrating information, technology, and people, your decision-makers can become performance managers. Performance managers look at metrics, plans and reports in their functional area to make the best possible decisions. [read more](#)
